The Road Show
Tensor

The *Virtual* Road Show

February 18th

www.TensorCorp.com/Virtual-Road-Show-Contractor

Brought to you by:

Tensor.

Tensor International Corporation is pleased to host a seminar covering a variety of construction topics with a focus on expediency in construction methods. Attendees will be able to choose from several breakout sessions, divided in to 3 tracks - feel free to jump from track to track based on your interests.

11: 00 am ET/8:00 am PT	Opening Session		
11:15 am ET/8:15 am PT	Keynote Speaker: Kenneth D. Simonson, Chief Economist, The Associated General Contractors of America		
	Executive Track	Project Manager Track	Estimator Track
12:30 pm ET/9:30 am PT	Deliver More Value on Projects: Learn how partnering with a dedicated Tensor team can reduce costs & speed construction.	Reduce Cost Overruns & Project Delays: Minimize or eliminate cost overruns, delays & changes from unexpected soft soils with Tensor.	Comparing Geogrid Performance & Performance Based Specifications
1:10 pm ET/10:10 am PT	Improve Productivity & Project Longevity: Learn how value engineered asphalt/rigid pavements can benefit your clients.	More Efficient Access Roads: Minimize project impacts, improve efficiency & speed construction schedules.	Deliver More Value on Projects: Learn how partnering with a dedicated Tensor team can reduce costs & speed construction.
1:50 pm ET/10:50 am PT	Faster, Lower-Cost Heavy-Duty Pavements: Learn a faster, more profitable method for heavy-duty pavement construction.	Best Practices for Geosynthetic Selection & Installation: Techniques for successful geosynthetic selection, handling & installation.	Extending Pavement Life with Pavement Interlayers
2:30 pm ET/11:30 am PT	Construction Estimating & the Pandemic: Principal Engineer of Gordian's RSMeans data explains changes made to the construction cost database to help estimators account for new business practices & health protocols.	Deliver More Value on Projects: Learn how partnering with a dedicated Tensor team can reduce costs & speed construction.	Case History: Panel Wall VE creates value for the contractor.
3:10 pm ET/12:10 pm PT	Geogrid Value Engineering Opportunities with Public Owners	County/Rural Road Design, Maintenance & Construction	Tensor Retaining Wall Systems Overview
3:50 pm ET/12:50 pm PT	PPP/DB Considerations for MSE Walls: Alternative backfills, facing options and phased construction.	Improve Profitability on Crane Pads, Laydown Yards & Working Surfaces: Learn mobilization, logistics & operational construction techniques that will increase the bottom line	Construction Estimating & the Pandemic: Principal Engineer of Gordian's RSMeans data explains changes made to the construction cost database to help estimators account for new business practices & health protocols.
4:30 pm ET/1:30 pm PT	Wide-Ranging Value For Alternative Construction Methods Inside & Outside Airport Fencing	Avoid Common Mistakes in Mechanically Stabilized Earth (MSE) & Reinforced Soil Slope Construction	Innovative, Constructable & Eco-Friendly Methods For River, Lake & Coastal Shore Protection
