

Case Study Summary

Whitney Young High School Field (IL)

Location

Chicago, IL

Owner

Chicago Public Schools

Contractor

K.R. Miller Contractors

Sub-Contractor

CPMH Construction

Engineer

David Mason and Associates

Installation Date

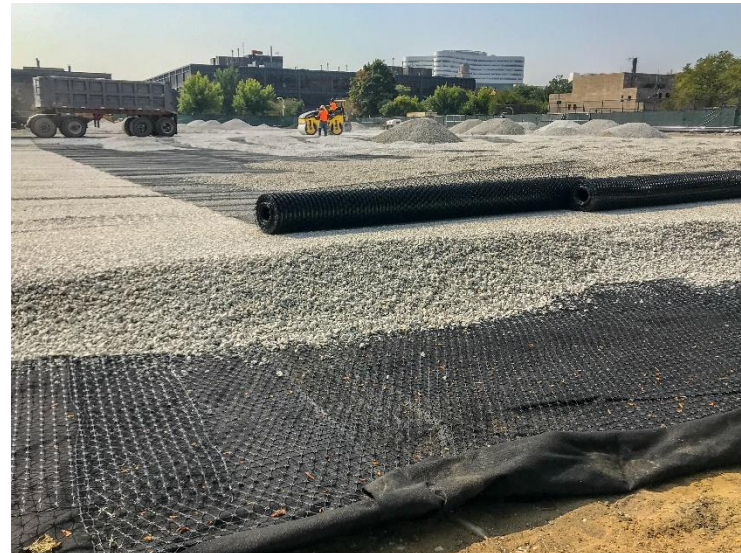

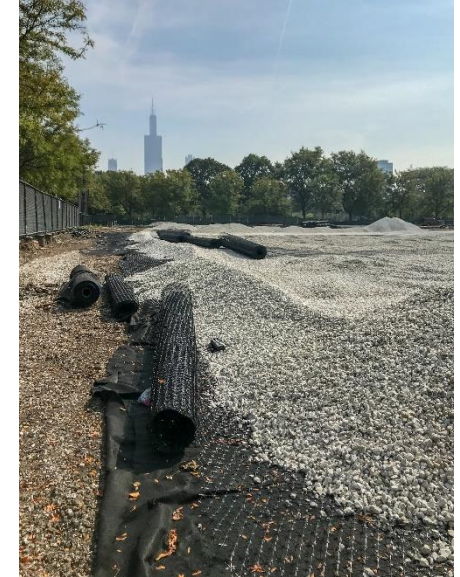

September 2018

Quantity

40,880 SY TX160

PROJECT DETAILS

Due to extensive rain, the subgrade for this track and field site had become extremely soft and threatened to slow down construction progress. Chicago Public Schools wanted a solution that saved time and money. A dual-layer system of TX160 eliminated the need for a 2 foot undercut at the facility. This design helped construction wrap up approximately one month sooner and saved \$502,000.
