

PROJECT

Thorntons LLC

LOCATION

Cicero, IL

OWNER

Thorntons LLC

CONTRACTOR

Walter Daniels Construction

SUB-CONTRACTOR

Iwema Excavating

INSTALLATION DATE

November 2019

PROJECT DETAILS

Soft subgrade soils were encountered during construction of asphalt parking at a Thorntons gas station and convenience store. Undercutting was avoided underneath the light duty asphalt section by placing Tensar TX7 geogrid underneath the CA-6 aggregate base. In heavy duty areas undercut was either avoided entirely or reduced to between 6" and 12" by using TX7 underneath the CA-6.
