

Hays, Kansas

## PROJECT

Old Highway 40 Mill and Overlay, Ellis County

## LOCATION

Hays to Victoria, Kansas

## PRODUCT

GlasGrid® 8520

## QUANTITY

88,600 square yards

## OWNER AND/OR DEVELOPER

Ellis County, Kansas

## CONTRACTOR

APAC Kansas, Inc

## ENGINEER

BG Consultants, Inc

## INSTALLATION DATE

April – May 2014

## PROJECT DETAILS

Approximately 6 miles of roadway consisted of 5.5 inches of AC overlying PC concrete. Joints in the PC concrete were spaced at intervals between 2.5 and 5 feet along the entire roadway and were reflecting up through existing AC causing a poor riding surface.

3 inches of AC were milled off and 4 inches of new AC were placed. GlasGrid® 8520 was used between the two, 2 inch AC lifts. GlasGrid® 8520 was used to mitigate future reflective cracking and extend the life of this heavy truck thoroughfare.
